 Dept. of Education of RCPSG

Scientific Programme 2018

Annual IMSA Convocation 2018  
 Award of IMSA Honorary Fellowship 2018.

IMSA Fraternity Congregation Celebration 2018

## Guidelines on submitting abstract for Oral Presentation and Poster Presentation

**Abstract: The Structure, Format, Content, and Style of Scientific Paper**

The Abstract should have the following contents:

**Title:** Paper should begin with a Title that succinctly describes the contents of the paper. Use descriptive words that you would associate strongly with the content of your paper. The title should be short and unambiguous, yet be an adequate description of the work. The title should contain the key words describing the work presented.

**Authors Name and Institutional Affiliation:**

**Abstract:** An abstract should summarize, in one paragraph (usually), the major aspects of the entire paper. Write your Abstract using concise, but complete, sentences, and get to the point quickly. Use past tense. Maximum length should be 200-300 words, usually in a single paragraph. Please check to make sure that the information in the abstract completely agrees with what is written in the paper.

**Introduction:** The question(s) you investigated (or purpose). Begin your Introduction by clearly identifying the subject area of interest. State the purpose very clearly in the first or second sentence. Briefly explain your rationale and approach and, whenever possible, the possible outcomes your study can reveal. State the purpose of the work in the form of the hypothesis, question, or problem you investigated. Use the active voice as much as possible. Some use of first person is okay, but do not overdo it.

**Materials & Methods:** The experimental design and methods used. Clearly express the basic design of the study. Name or briefly describe the basic methodology used without going into excessive detail-be sure to indicate the key techniques used. The style in this section should read as if you were verbally describing the conduct of the experiment. You may use the active voice to a certain extent, although this section requires more use of third person, passive constructions than others. Avoid use of the first person in this section. Remember to use the past tense throughout - the work being reported is done, and was performed in the past, not the future.

**Results:** The major findings including key quantitative results, or trends. Report those results which answer the questions you were asking identify trends, relative change or differences, etc. Present your key results, without interpretation, in an orderly and logical sequence using both text and illustrative materials (Tables and Figures). The text of the Results section should be written concisely and objectively. The passive voice will likely dominate here, but use the active voice as much as possible. Use the past tense.

**Discussion:** A brief summary of your interpretations and conclusions. Clearly state the implications of the answers your results gave you. The discussion should interpret the results in the light of what was already known about the subject of the investigation, and to explain new understanding of the problem after taking the results into consideration. Use the active voice whenever possible in this section.

**Acknowledgments, (Optional)**

**Literature Cited**

**Appendices (Optional)**

### Registration Fee Structure

Category	GBP		GBP
	Upto	Upto	Spot
IMSACON Member	25.05.18	25.06.18	500
Spouse/Acc Person	360	410	500
NON IMSACON Member	410	450	550
Spouse/Acc Person	410	450	550
PG Students	300	300	300
UG Students	300	300	300

#### Remittance of Regn. Fee

**Name of the Beneficiary / Account:** IMSA

Address of the Beneficiary: 2nd Floor, National Medical library Building, Ring Road, Ansari Nagar, New Delhi 110029, Tel.: 011 26588226, 26589660
