

JIMSA

JOURNAL OF INTERNATIONAL MEDICAL SCIENCES ACADEMY

October - December 2014
Vol. 27 No. 4

FROM EDITOR'S DESK

Dear Colleagues,

Antibiotics are highly misused in the practice of medicine. Increasing overdose of antibiotics is not only associated with adverse reactions but often leads to emergence of resistant strains. Unfortunately, viral infections, especially minor infections such as hepatitis B, C, HIV, S&RS, Ebola are quite complex and require prolonged treatment; though at times, their elimination from the body becomes a big challenge. **Prof. S. Anuradha**, an eminent Infection disease specialist, in an editorial on Antiviral Agents and Treatment of viral infections, has amply highlighted some of practical facets of the antiviral therapy.

Several original articles, case reports and reviews on subjects from different disciplines of Medicine are published in this issue and will be of immense interest to the readers of JIMSA. An Update on a new form of diabetes mellitus i.e. 'Mitochondrial Diabetes' scripted by **Dr. Shalini Mani** and its differentiation from Type I & Type II diabetes; provides a fascinating reading. Similarly, brief writeup on 'Epigenesis of Obesity' and critical review of 'Rising Trends of Caesarean Deliveries' are thought provoking articles, published in this issue.

A *Symposium* on 'Vitamin D in Health and Disease' by **Prof. Pavan Malhotra** covers several physiological and clinical aspects, related to the burning topic of the day. Multiple benefits of Vitamin D in maintaining physiological functions of the body and good general health, have been brilliantly discussed by various authors I wish to congratulate the guest editor of symposium for an excellent exposition of the subject.

I wish to convey my heart felt good wishes for a very happy year 2015 to all fellows, members and readers of JIMSA.

P. D. Gulati

TRIPRIDE 1/2 LV
(Glimi 1 & 2mg + 500mg + Voglibose 0.2mg)
