PRESIDENT WRITES

Dear Fellows, Members and Associates,

Our editor has chosen a burning problem “**Metabolic Syndrome**” which affects the younger generation leading to permanent disability and a colossal manpower loss, national productivity and wealth depletion. So it is high time that the medical fraternity should direct all their efforts to find out the etiology of this particular problem. It is not far off, we will come out with a solution.

I call upon my fellows, members and associates to make a concerted effort so that this burning problem becomes an issue of the past.

K. Jagadeesan

Dr. K. Jagadeesan
President, IMSA

Thank you

for making
