Vol. 28 No. 3

## PRESIDENT WRITES

Dear Fellows, Members and Associates,

This issue of the journal has emphasized one of the very common problem we come across in our day to day clinical practice i.e. urolithiasis. I am sure further in-depth study is on to find out the etiology, possible prevention and cure. With the newer insight into the cause I am sure the answer in preventing this condition is not far off.

With the advent of sonology, incidental stone pick up and a symptomatic urolithiasis is much more than what was thought of in the past. A good simple examination of urinary sediment can give an indication by detecting microscopic hematuria.

Our annual convention at Wayanad, Kerala is fast approaching. I am sure we will have an interesting session as in the past.

Looking forward to meeting you all.
