PRESIDENT WRITES

Dear Fellows, Members and Associate Members

Autoimmune diseases pose a global challenge; etiology of these is still a puzzle. These affect all the systems and all age groups. Various forms of therapy i.e. immunosuppression, steroids, apheresis and many others, are indicative of the fact that we don't have a specific etiological agent, yet in sight. I think if our researchers and fellows concentrate on this issue, it could be solved at least in the future. I am sure the day is not far off; we will be able to find a solution and brighter future for those who are suffering from systemic sclerosis, rheumatoid arthritis and many such other conditions.

K. Jagadeesan
